gridpulse-vm: same image, running and healthy

Digests on the VM match the laptop and the registry exactly; the forecast reports xgboost-v1; db, backend and frontend all (healthy); the db is on internal port 5432

```
lamdev@l3016gridpulse-vm:~/gridpulse$ cd ~/gridpulse

Current spend: October 2026

Cost \$2.42 this month, fully covered by free-trial credits (\$0.00 billed); US\$289 of US\$300 trial credit remaining.

No-cost trial credit

US\$289

Free trial credit

Out of US\$300

76

Days remaining

Ends 19 December 2026

You are not billed during your free trial. When the free trial ends, all resources that you created during the trial are stopped and you will not be charged, unless you upgrade to a paid Cloud Billing Account.

Please note: The free trial period cannot be paused or extended. The free trial ends after all available credits are consumed, or at the end of the free trial period, whichever happens first.
